

Sergei Sanches-Peres

Batumi, Georgia

SUMMARY

Software Engineer with 2.3 years of commercial experience in full-stack development and computer vision. Specialized in Python (FastAPI), JavaScript (Next.js, Node.js), and PostgreSQL. Proven track record of delivering production solutions: developed and deployed a computer vision system using YOLO and OpenCV across 12 poultry farms, automating quality control and improving operational efficiency. Experienced in Docker, Linux server administration, and building REST APIs. Currently pursuing a Bachelor's degree in Computer Software Engineering. Looking for a position where I can apply my skills in full-stack development, ML/CV integration, and scalable system deployment.

EXPERIENCE

RX-PROM | Software-Engineer

November 2023 - June 2025 | Moscow | Full-time

Developed full-stack web applications for insurance companies, working across frontend, backend APIs, databases, and deployment using modern web technologies. Developed and deployed a Python-based computer vision system using OpenCV and YOLO for automated egg detection and quality control, implemented across 12 poultry farms, with supporting infrastructure including Docker, PostgreSQL, Ubuntu Server, and industrial cameras.

Remfy | Junior Web-Developer

November 2022 - January 2023 | Moscow | Full-time

Worked as a Junior Web Developer, developing reusable web components and interactive widgets using JavaScript, HTML, CSS, and jQuery. Implemented responsive, cross-browser interfaces and integrated new features into an existing production codebase.

EDUCATION

Moscow Witte University | Bachelor Computer-Software Engineering and Data Processing

September 2023 - December 2027

Currently pursuing a degree with a focus on Python programming, data processing, and software development.

Tsaritsyno College | Diploma Web-Development and Graphic Design

September 2020 - June 2023

Studied full-stack web-development, Linux system administration and databases. Areas of study:

Web development:

JavaScript, HTML, CSS, Node.js, React.js

Databases: MySQL, PostgreSQL

Linux system administration and server management.

SKILLS

Tech skills:

Python 3.12

JavaScript/TypeScript

HTML5/CSS

PostgreSQL

Git/GitHub

Next.js/React.js

FastAPI

Soft skills:

Agile/Scrum

Documentation

Candidate interviewing
